CONTERRA PRE-CAST

Pre-cast Solutions for Commercial and Residential Properties

Conterra Pre-cast offers architectural products, turn-key installations, and custom designed materials with competitive prices. Most of our products can be delivered or installed in 4-6 weeks from the time of order. Conterra Pre-cast has built a reputation on products fabricated for our clients, and with expectations met. Large scale production or single unit orders are completed in a timely manner and can be professionally installed for a clean, elegant finish for any project.

Our pre-cast comes in a wide variety of shapes, sizes, colors, and textures. Along with our standard sizes that fit most applications, we can custom build any product to meet our customers needs. The Conterra Pre-cast team strives to manufacture the very best product delivered to our customers on time. Give us a call and see what we can do for your project.

WWW.CONTERRACONSTRUCTION.COM

Quality

Conterra Pre-cast is committed to becoming the industry leader in pre-cast concrete by focusing on customer service and product quality. Our color and texture matching system, insures that the product we ship exactly meets your expectations, and since we make the molds in-house, our customers can be assured that our products meet and exceed even our own high standards.

Service

Conterra Pre-cast can turn your design into reality. Our drafting specialists allow our customers to create the very best pre-cast for their distinctive projects. The Conterra Pre-cast team strives to get the very best product delivered to our customers on time.

Installation

Conterra Pre-cast products can be expertly installed by our highly skilled personnel. We take the time necessary to do the job right for a clean and professional appearance. And, since we design, manufacture, and install our own products, we are a cost-effective option for all project designers.

Materials

All of Conterra Pre-cast products are available in **Concrete**, Glass Fiber Reinforced Concrete (**GFRC**), and Glass Fiber Reinforced Gypsum (**GFRG**).

Concrete is ideal for long term outdoor use, but it can also be used for indoor applications. Concrete is available in our nine standard colors by adding pigments during manufacturing:

Concrete is heavy and is not always suitable for all applications, therefore, Glass Fibers may be added during manufacturing. Glass Fiber Reinforced Concrete (**GFRC**), is a concrete product manufactured using sand, cement, glass fiber, and acrylic polymers for curing and strength. GFRC can be up to 75% lighter than traditional concrete. Like concrete, GFRC is also available in our nine standard colors and a variety of finishes.

Glass Fiber Reinforced Gypsum (**GFRG**), is used for indoor applications only. This material is ideal for fireplaces and indoor columns. Conterra Pre-cast uses high quality gypsum with glass fiber for strength. GFRG is only available in a paint-grade smooth, white finish. This product is best suited for painting and faux finishing.

Colors

To add diversity to any project, Conterra Pre-cast offers nine standard colors to choose from.

Concrete is not uniform in color and you will see subtle variations or 'mottling' in both grey and colored concrete.

Colored products may differ slightly from the illustrated colors. Exact color shade will vary depending on the material and texture selected. Color variations are also expected when products are cast from different batches of material. Additional colors, customs colors, color matching, and color chip samples, are available as well. Please call for your project needs.

Textures

Light
Sandblast
Texture

Medium
Sandblast
Texture

Heavy
Sandblast
Texture

To add detail to your project, Conterra Pre-cast offers six different standard textures to chose from.

Concrete is a porous material and you should not be surprised to see tiny 'bugholes' on smooth surfaces.

Paint
Grade
Smooth
Texture

Acid Etch
Texture

Travertine
Texture

Textures shown are available for all products, however, some textures are better suited for some applications than others. Please call for additional textures not shown and custom textures to match your project needs.

Fireplace Surrounds

Fire surrounds offer a cozy, but elegant feel to any room.

A surround consist of a mantel, hearth, and pillar pieces (plain or ornamental). A combination can be used to create a personal touch on some pieces.

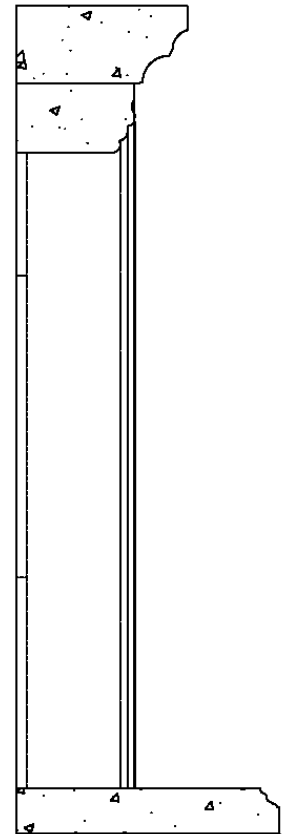

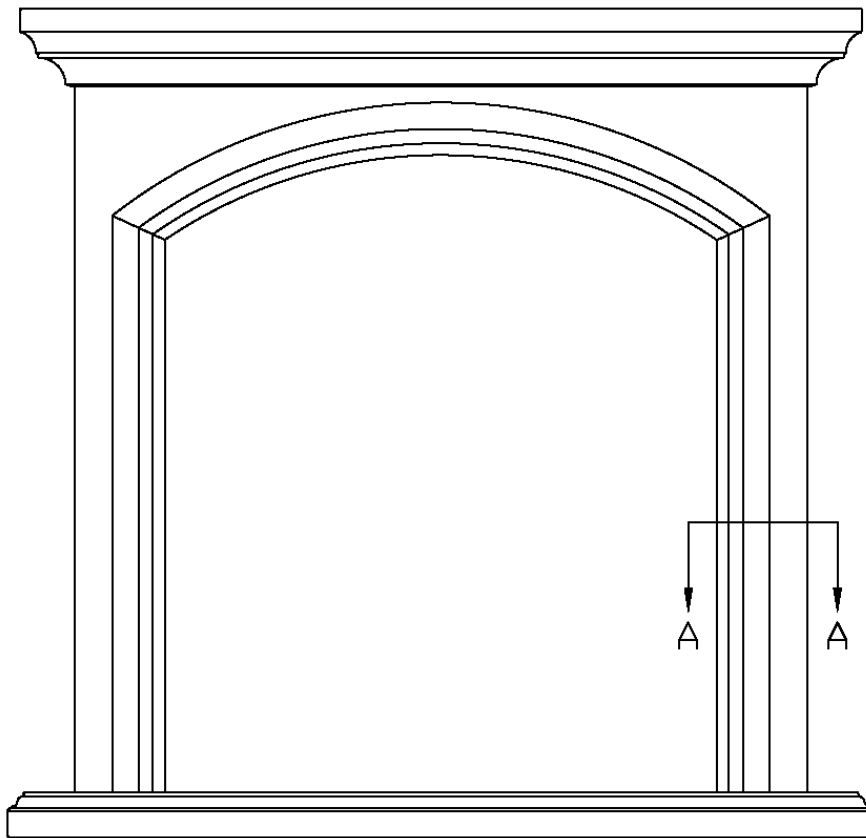

Hearth pieces can be constructed to be level with the floor or raised to any combination of heights.

Conterra Pre-cast offers various finishes and colors according to your personal taste.

Architectural Trim

The possibilities are endless when using Conterra Pre-cast trim to surround your doors and windows.

Architectural trim is ideal for custom homes, as well as setting yourself apart in a tract home. Businesses also benefit from trim by bringing elegance and sophistication to commercial buildings.

Whether you are looking for window sills, door surrounds and trim, or wall details, Conterra Pre-cast offers a wide variety of designs.

Notes:

Pilaster Caps

Pilaster caps enhance the character of any wall or pilaster project.

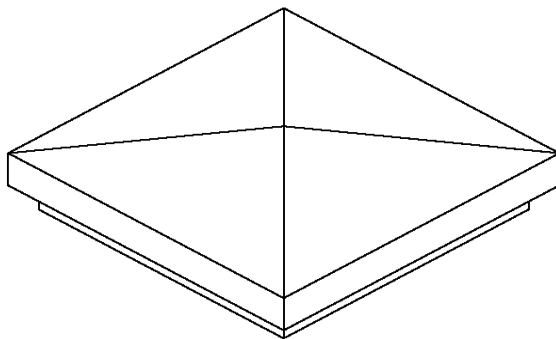

Conterra Pre-cast offers a large selection of pilaster caps to choose from. We offer standard sizes to cover most projects.

In addition to our standard selection, any combination of height, width, style, finish, and color can be created to personalize your project. Most of our pilaster caps can also be customized with specified hole sizes in the center to accommodate light poles, trellis, etc...

Notes:

Balustrades

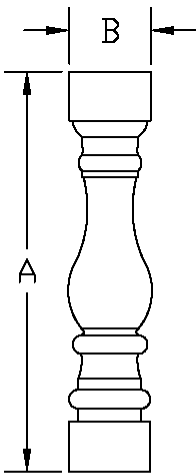

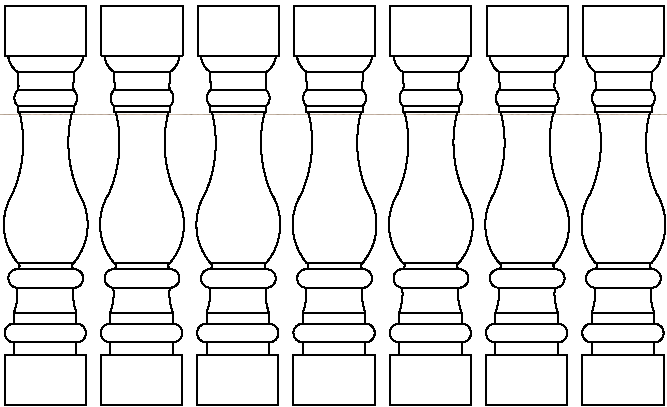

Balustrades enhance the beauty, value and character of fine architecture.

In addition to our selection of standard balustrades, any combination of height, width, style, finish, and color can be specified to create a custom balustrade design.

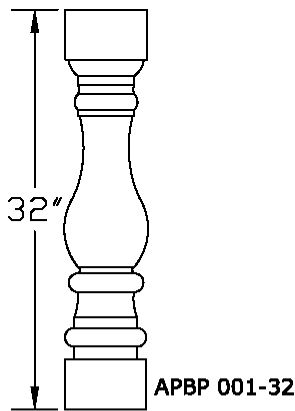

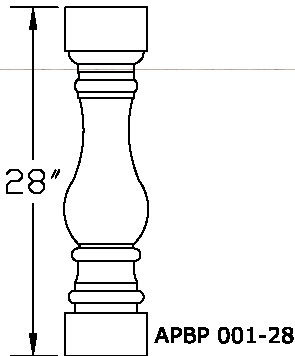

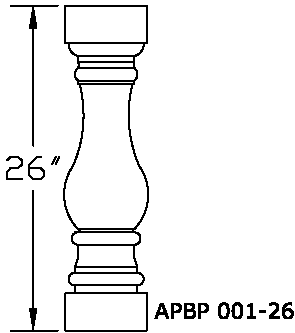

It is important to refer to your local building codes when designing any rail system for proper baluster spacing and rail height regulations.

Signs

Conterra Pre-cast signage offers a way to create a memorable entrance to your project; whether it is a housing development, business, park, etc... , we can offer the image your company needs.

Our signs can be poured -in-place at your location, or made at our facility and shipped ready for installation.

All signs are custom made to a customers specific needs, including size, font, color, and finish.

**Signs are custom made.
All designs are per client specifications.**

Notes: _____

Waterscapes and Fountains

Conterra Pre-cast has built a reputation for designing anything our customers desire.

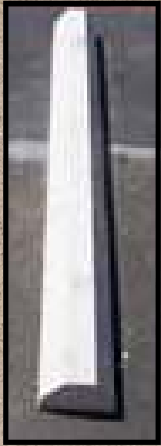

Our design team is comprised of talented individuals that design and/or coordinate with architects, landscape architects, and engineers to create leading edge waterfalls and fountain designs for fabrication. Our experienced craftsmen use only the most durable and resilient materials, which are essential for the construction of custom water features.

Our team can create your water feature from concept to construction.

Commercial Grade

Conterra Pre-Cast offers Commercial Grade site furnishing such as pre-cast wheel stops and parking bumpers.

Pre-cast wheel stops can provide added protection against vehicles when installed along pedestrian paths of travel and adjacent to buildings and site walls in parking areas. These cost effective items are made at our facility and shipped ready for installation in standard sizes.
